

Getting Started with Cisco Webex VDI on IGEL OS

- i** You have the following options to edit the configuration of your IGEL OS 12 device:
- via the IGEL UMS Web App:
 - **Configuration > Create new profile**  (Use the **App Selector** to select one or several apps which will be configured by the profile.)
 - **Apps > [name of the app] > Create new profile** (used to quickly configure a profile for the selected app. It is also possible to add other apps which will be configured by this profile)
 - **Devices > [name of the device] > Edit Configuration** (In the device configurator, all installed apps are displayed under the tab **Apps**.)
 - via IGEL Setup locally on the device (shows all installed apps. Apps are displayed under the tab **Apps**)

The best practice to configure your devices is via profiles. For details on how to create profiles, see [How to Create and Assign Profiles in the IGEL UMS Web App](#).

Dependencies

As Cisco Webex VDI handles multimedia redirection but is not a standalone application, it cannot be used on its own. At least one of the following apps must be installed and configured as well:

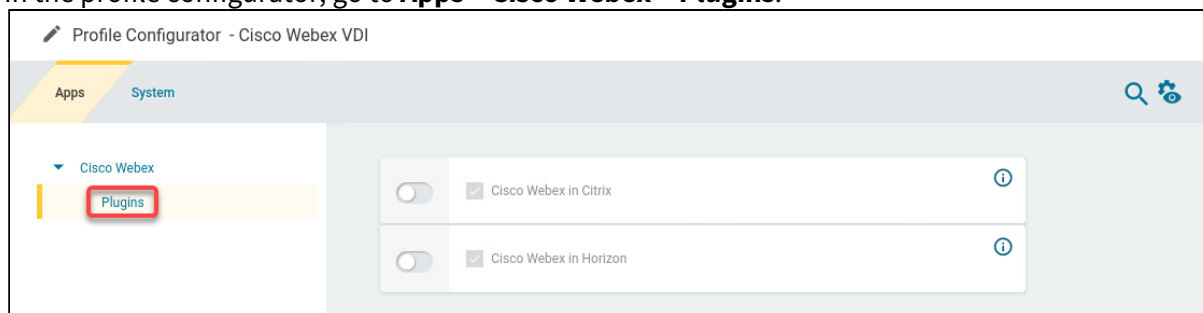

- Citrix Workspace app
- VMware Horizon Client

If your users want to make audio and video calls with Cisco Webex, the following app must be installed:

- Cisco Webex Meetings VDI

How to Disable or Enable the Plugin

1. In the profile configurator, go to **Apps > Cisco Webex > Plugins**.

2. Change the settings as required.

i A dongle must be used if delivered with a device (e.g. with a headset, etc.).
