## Getting Started with Cisco Webex VDI on IGEL OS

- i** You have the following options to edit the configuration of your IGEL OS 12 device:
- via the IGEL UMS Web App:
    - Configuration > Create new profile** (Use the **App Selector** to select one or several apps which will be configured by the profile.)
    - Apps > [name of the app] > Create new profile** (used to quickly configure a profile for the selected app. It is also possible to add other apps which will be configured by this profile)
    - Devices > [name of the device] > Edit Configuration** (In the device configurator, all installed apps are displayed under the tab **Apps**.)
  - via IGEL Setup locally on the device (shows all installed apps. Apps are displayed under the tab **Apps**)

The best practice to configure your devices is via profiles. For details on how to create profiles, see [Creating a Profile](#).

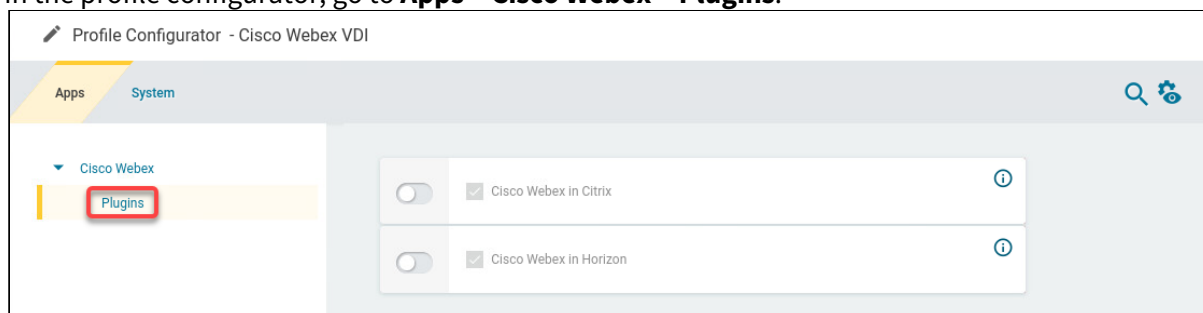

## Installation

As Cisco Webex VDI handles multimedia redirection but is not a standalone application, it cannot be used on its own. At least one of the following apps must be installed and configured as well:

- Citrix Workspace app
- VMware Horizon Client

## How to Disable or Enable the Plugin

- In the profile configurator, go to **Apps > Cisco Webex > Plugins**.

- Change the settings as required.

### Cisco Webex in Citrix

- ☒ The Cisco Webex VDI plugin is enabled in Citrix sessions. (Default)

☐ The Cisco Webex VDI plugin is disabled in Citrix sessions.

**Cisco Webex in Horizon**

☒ The Cisco Webex VDI plugin is enabled in VMware Horizon sessions. (Default)

☐ The Cisco Webex VDI plugin is disabled in VMware Horizon sessions.
