Third-Party Devices Supported by IGEL OS 11

Core Requirements

- CPU with 64-bit support
- CPU speed: ≥ 1 GHz
- Memory (RAM): ≥ 2 GB

> ⓘ RAM size higher than 2 GB is recommended if you use any of the following:
> - Unified Communications optimizations (uses a client-side media engine)
> - High-resolution graphics output
> - More than two monitors

> ⓘ With devices that have 2 GB RAM and shared video memory, a maximum of 512 MB may be used as video memory.

- Storage: 2 GB minimum; ≥ 4 GB recommended

> ⓘ **Storage Requirements for IGEL OS 11.04 or Higher**
>
> IGEL OS 11.04.100 or higher requires at least 2.4 GB storage if the full feature set is applied. Thus, the feature set must be modified accordingly; for more information, see Error: "Not enough space on local drive" when Updating to IGEL OS 11.04 or Higher.

- No VIA graphic adapter; VIA graphics support is discontinued in IGEL OS.
- Legacy Bios and EFI/UEFI are supported.

Devices Officially Supported by OSC and UD Pocket with IGEL OS 11

> ⚠ The following list only includes those devices that are **tested by IGEL** (with each major release of IGEL OS). Different configurations of listed device models, which still meet the core requirements(see page 5), are expected to be functional in IGEL OS. These are not tested and only for that reason not officially supported by IGEL.
> Further supported devices can be found on the IGEL Ready[2] Showcase at https://www.igel.com/ready/showcase-categories/endpoints/.
> Integrated drivers and supported peripherals are listed in the Third-Party Hardware Database[3]. For more solutions compatible with IGEL OS, see Partner Solutions.
> For any devices not listed here or on the IGEL Ready showcase, contact your hardware vendor and request that those devices be added to the IGEL Ready program.

> ⓘ For some of the devices listed here, Flash memory must be extended to ≥ 2 GB. For these devices, an appropriate note is added.

> ⓘ On modern computers such as secured-core PCs (see e.g. https://www.microsoft.com/en-us/windows/business/devices?col=secured-core-pcs), there may be a BIOS setting related to Secure Boot that allows the use of Microsoft's 3rd party UEFI Secure Boot Certificate. The usual description of such a BIOS setting is "Allow Microsoft 3rd Party UEFI CA". This setting must be set to enabled, as IGEL uses the 3rd party certificate to support UEFI Secure Boot. If UEFI Secure Boot is enabled, but "Allow Microsoft 3rd Party UEFI CA" is not enabled, you may be unable to boot IGEL OS Creator or UD Pocket. Similarly, if the setting "Allow Microsoft 3rd Party UEFI CA" is disabled after a previous installation of IGEL OS, IGEL OS will fail to boot. For how to enable the setting, see Secured-Core PCs: Microsoft 3rd-Party UEFI Certificate for Secure Boot.

> ⓘ [Fn] keys may not work on some supported and listed laptop/notebook models.
